

The delivery arm that lands the ShiftForge deals.

How Top Gun Engineering is positioned in the ShiftForge ecosystem — as the trusted consulting + implementation partner that walks onto mine sites, deploys the tech, and stays on retainer.

The positioning shift

Top Gun Engineering was originally positioned as a general engineering consultancy. With ShiftForge in the mix, Top Gun becomes something more specific + more powerful:

Old positioning: engineering consultancy competing on hourly rates against every other engineering firm in Australia.

New positioning: the ShiftForge deployment partner — the only firm in Australia that combines maintenance intelligence software with on-site engineering delivery for mining + heavy industry.

This is a category-of-one position. No general consultant can replicate the ShiftForge tech. No pure SaaS competitor has boots on the ground. Top Gun owns the seam.

The service catalogue

Service	Duration	Price band
Site scoping + Asset Register buildout	2-4 weeks	\$15-30k
Full ShiftForge deployment (single site)	6-8 weeks	\$40-80k
Crew training (all shifts)	1 week	\$8-15k
Enterprise system integration (SAP-PM / Pronto / HxGN EAM)	4-8 weeks	\$25-60k
Monthly optimisation retainer	ongoing	\$8-15k/mo
Custom dashboard / report development	as needed	\$5-20k per build
Emergency incident support (24/7 on-call)	SLA basis	\$50k/yr per client

The sales flow

Step 1 · Discovery call — Top Gun approaches a mine ops manager. Diagnose their current handover pain. No pitch of tech yet — just listen.

Step 2 · Pilot proposal — 30-day free trial · 1 crew · 1 shift · runs alongside existing paper process. Zero risk to client.

Step 3 · Pilot delivery — Top Gun crew on-site loading asset data, training the fitters, wiring up AI, generating reports. 4-week engagement.

Step 4 · Pilot review — end of 30 days. Measured outcomes (time saved per shift, faults caught early, handover quality). Client decides.

Step 5 · Site licence + expansion — client signs 12-month SaaS + Top Gun implementation for next crew / next shift / next site. Land + expand.

Step 6 · Retainer conversion — after 90 days on the platform, offer monthly consulting retainer for optimisation + pattern reviews.

Step 7 · Referral engine — happy clients refer to sister sites. Mining is a small industry — reputation travels fast.

The two-brand play

Client-facing, both brands are visible but Top Gun is the primary relationship:

- **Emails from:** Top Gun Engineering (delivered by ShiftForge)
- **Contracts signed with:** Top Gun Engineering
- **Invoices from:** Top Gun Engineering
- **Platform login:** app.shiftforge.io (with Top Gun co-brand top-left)
- **Business cards:** "Top Gun Engineering · ShiftForge Deployment Partner"
- **LinkedIn positioning:** Casey as "Founder · ShiftForge · Powered by Top Gun Engineering"

The pitch line

"Top Gun Engineering is the maintenance intelligence delivery partner for mining and heavy industry. We deploy ShiftForge — our proprietary maintenance intelligence platform — onto your site inside 30 days. Your fitters keep their existing tools. Your enterprise systems keep running. What changes is the intelligence layer between your crews and your data — and inside 90 days, you're catching faults 240 hours before they cost you a shutdown."
